

OptionButton

```
classDiagram
    class OptionButton
    class AugmentEffectSelector {
        +SelectAugment()
    }
    AugmentEffectSelector --|> OptionButton
```

The diagram shows two classes. The 'OptionButton' class is represented by a white box with a black border, divided into three horizontal sections. The top section contains the class name 'OptionButton', while the middle and bottom sections are empty. The 'AugmentEffectSelector' class is represented by a gray box with a black border, also divided into three horizontal sections. The top section contains the class name 'AugmentEffectSelector', the middle section is empty, and the bottom section contains the public method '+ SelectAugment()'. A blue arrow with a hollow triangular head points from the top edge of the 'AugmentEffectSelector' box to the bottom edge of the 'OptionButton' box, indicating that 'AugmentEffectSelector' inherits from 'OptionButton'.

AugmentEffectSelector

+ SelectAugment()
